# Dashboard Deployer
Dashboard Sharing for Sugar®

Easily create custom dashboards and seamlessly share them with individual users, teams, and user groups with this powerful new integration from Intelestream.

CRM administrators can roll out new dashboards to any user or group, and update existing dashboards with new dashlets with just a few clicks. Designed from the ground up to be fully compatible with the latest version of Sugar®, Dashboard Deployer is an essential tool for keeping users and teams on the same page.

Features & Benefits

Create and Share
CRM administrators can create new dashboards for any combination of users, user roles, and team assignments. These dashboards can then be shared instantly.

Seamless Deployment
Our Dashboard Deployer is simple to install, intuitive to use, and easy to update.

Fully Compatible
Easily integrate Dashboard Deployer with your existing customizations and plugins. Share specialized dashlets across your entire CRM instance.

Designed for Sugar®
Created with Sugar® 7.9 in mind, Dashboard Deployer is built to take full advantage of the software's latest updates.

Support You Can Count On
Designed and maintained by Intelestream, Dashboard Deployer is backed by one of the best support teams in the Sugar® community.
