

Proactive Support for Sugar®

The launch of a perfectly implemented CRM isn't the end of the journey, it's just the beginning. As your company grows, it's essential that you have the best support team available to keep your CRM in tune. Our Extended Support service provides your business far more than just a few hours of tech support every month, and instead delivers an exceptional level of proactive support and development customized to match your needs.

We're not just here to fix technical problems when they pop up. We're here to be a true partner in your company's CRM success story. As your business scales, we'll help you use your CRM to find workflow improvements, refine processes, and boost efficiency. Extended Support enables you to keep getting the best value from the system you've invested in.
