

HubSpot for Sugar® Integration

If two minds are better than one, then connecting two powerful and innovative software programs is ingenious. Now you can keep Sugar's adaptability, and pair it with the bona fide benefits of HubSpot, which is the leading developer of inbound marketing and sales software in the world.

The HubSpot for Sugar integration creates a bidirectional sync that offers the flexibility to produce and analyze your most dynamic campaigns and keep your records clean and up-to-date.

By having access to all the advantages that both systems have to offer, you'll gain insight into specific campaigns within HubSpot, as well as access to a contact or lead's HubSpot activity within their record in Sugar.
